Present

The Titan-2K is a head camera specifically designed for use in surgical and general medical procedures. The system offers complete mobility and universal video distribution, be it inside the operating theater or over the intranet.

The Titan-2K brings 21st century communication technology into your OR.

Titan - 2K : Power in the Pocket

The Titan-2K System offers endless processing power, processing power to effortlessly record, cast and stream in Full HD simultaneously. It comes with a choice of camera modules with different lenses: 15.8 & 9.6mm.

The CinVivo Software provides the means to:

- Record in various videos formats (1440, 1080, 720)
- Cast live video and recordings to any monitor (in the OR)
- Stream live video and recordings via Intranet to encrypted "video rooms"
- Control video recording settings remotely through Tablet
- Real-time electronic image stabilization

1440p / 9.6 or 15.8mm Lens, Large Depth of Field
Anodized Aluminum Case

Expansive Video Distribution

- Record your Skills and Procedure Details
- Share With Entire OR Staff (Casting)
- Use As A Live Teaching Tool
- Secure Objective Documentation
- Present to External Audiences
